Heating system repairs

News from Church Council Chair Allen Cook:

"With winter here, we became coldly aware that Babbitt Hall was not being heated properly. An inspection on December 22 beneath the building revealed that most of the air ducts between the furnace and heat registers were damaged (actually shredded) likely by small critters. (Attached photo shows the extent of the damage.) We contacted a heating and air conditioning service company (Darrell's HVAC in Livermore) to repair and replace the damaged ducts. The repair work was completed December 23, just in time for our Christmas Eve service.

"Many thanks go to Kevin Matlock and his friend, John, who are designing and will erect a new lighting structure behind the sanctuary to illuminate our stained glass window. The floodlights are a dawn-to-dusk system that can also be switched off manually when not in use or needed. They hope to have the project finished by late January."
